*The 1939 Register was taken on 29 September 1939. The information was used to produce identity cards and, once rationing was introduced in January 1940, to issue ration books. Information in the Register was also used to administer conscription and the direction of labour, and to monitor and control the movement of the population caused by military mobilisation and mass evacuation. As the 1931 census for England and Wales was destroyed by fire during the Second World War and no census was taken in 1941, the Register provides the most complete survey of the population of England and Wales between 1921 and 1951.*
